

THE Gleichen Call

TWENTY-FIFTH YEAR

No. 52

GLEICHEN, ALBERTA, WEDNESDAY, MARCH 16, 1932

SUBSCRIPTION \$2.00 PER YEAR

Town Council Set Mill Rate For This Year Transact Considerable Business

N. T. Purcell and R. W. Brown Represent Merchants and W. Halstead of Board of Trade Attend Meeting

Much business was transacted at the meeting of the town council held last Tuesday evening in the council chambers. Mayor Yates and Councilors A. F. MacCallum, W. E. Thompson, Chas. Thompson, J. A. Menard and J. W. Moss were present.

N. T. Purcell, R. W. Brown and W. Halstead were also present. N. T. Purcell and R. W. Brown were representing four of the retail grocery merchants of town. They were present in regard to the hawkers and peddlers act and more particularly in regard to the Chinaman who was selling vegetables and fruit in town.

Mr. Purcell outlined the case for the merchants in detail. They wanted the Council to prepare a resolution asking the Government to change the hawkers and peddlers act so that the fee could be imposed for revenue purposes. The best way to do this would be to take it up through the union of Alberta Municipalities organizations. This matter had been taken up with the Municipalities last year and it has been drafted along with some other resolutions for attention. The council thought that it might be taken up at the present sitting of the Legislature and they would wait till after the session was over and if nothing were done they would then go into the matter.

W. Halstead was present as one of a committee from the Board of Trade to find out what the Town intended to do about trees this year, also about parks etc.

The council were not in a position to say what they were prepared to do this year on account of the lack of finances. The trees that are already planted would have to be looked after at any rate. It was stated that a lot of damage had been done to trees lately. The secretary was instructed to draw up a by-law regarding people damaging trees and the penalties pertaining thereto. The Mayor advised the council could not promise anything but would try and advise Mr. Halstead in this regard by Saturday.

Secretary had received letter stating that MacDonald would receive an allowance of \$15.00 per month which would be paid to the hospital. \$5.00 besides for himself. That was a war veterans allowance and dated from January 8th, 1932.

Fred Jones had made application by letter for the use of the Burch property at a rental of \$2.00 per month. This is the old Bottrell tire station. This property was up for sale on January 23rd but was unsold.

Coun. MacCallum and Menard: That we rent this building to F. W. Jones for \$2.00 per month.—Carried.

Re Leacock property a misunderstanding apparently had happened about this. The secretary had not done anything thinking a by-law would be passed declaring the property to be a nuisance. It was considered best to get transfer to this property same as had been done in the Bates case.

Coun. MacCallum and W. Thompson: That secretary write to the Northern Trust Company who are looking after the estate stating that the condition of this building is such as to be a nuisance and in order to avoid taking steps to have it removed that the town would ask them to give a transfer of same to the town and that the town would pay for the expenses of the transfer.—Carried.

It would not be necessary to wait for a year to do something with it if the town obtained a transfer. Two letters were read making offers for purchase of this building. The letters were held over as the town could not deal with them until it had title to the property.

Secretary had received transfer from H. G. Bates covering his property. He had sent H. G. Bates for the discharge of mortgage held by F. K. McKay which Bates claimed to have. The secretary was instructed to get a general release certificate covering this property.

Since setting a mill rate at last meeting it was found that the rate had been set a little too low. Town statements had been submitted to the Bank in connection with the application for credit and they were of the same opinion regarding the mill rate. Making due allowance for non revenue producing property the mill rate should be at least 55 mills.

Coun. Thompson and MacCallum: That the resolution at meeting held February 15th, 1932 setting mill rate at 50 mills; 33 mills municipal; 15 mills school; 4 mills supplementary; revenue and 10 mills on farm lands be amended to read as follows. 38 mills for municipal purposes; 13 mills for school purposes inside the town; 4 mills for supplementary revenue and 10 mills for farm lands outside the town. Total 55 mills.—Carried.

SLEEPING IN HIGH SCHOOL SHOULD BE PERMITTED

The senior group of the Young People's Society met at the Oddfellows Hall last Tuesday night. A usual meeting was well attended. During the business part of the meeting the question was brought up of raising funds for Society purposes. A committee composed of Misses Cook Van Volkenburg and Morton was appointed to investigate the possibilities of successfully putting on a play. This committee will report at the next meeting. At the conclusion of this part of the meeting a most interesting debate was held, the subject of which was "Should sleeping be encouraged in high schools." Peter Downey and Max Yates, both officers of the Society took the affirmative side of the question. The losing team, Misses Jean Cook and Kathleen Beach took the negative side. The debate was keenly contested; the affirmative side winning only by a very small margin. The material and delivery were excellent.

Through the columns of the Call the Young People wish to express their thanks to Mr. and Mrs. W. P. Pincau for kindly acting in the capacity of judges. Following the debate dancing was enjoyed, and a delightful luncheon was served by Misses Taylor, Stubbs, Phillips, Woods and Ostrander.

The next meeting will be held in the I.O.O.F. hall on Tuesday, March 22nd, at the usual time. All members are urgently requested to attend.

Frank Sharp, C.P.R. telegraph operator, saxophone player, and a hale fellow well met, is at present in town visiting friends. Frank is the best sax player for dances ever heard play in Gleichen. Here's hoping that he stays in town for sometime.

Messrs. Ferngreen and Winkler of Milo spent Thursday in town visiting friends.

NEW SLATE OF OFFICERS ELECTED CHAMBER OF COM.

The annual meeting of the Chamber of Commerce of Gleichen and District was held in the Meadowbrook hall on the evening of March 11th. President N. T. Purcell occupied the chair. In giving his report he outlined the activities of the organization during the past year. He referred particularly to the Bow River picnic, which some 500 people attended and the Provincial Government School of Agriculture, which was held in Gleichen on February 18th. Col. A. G. B. Lewis as usual led in the community singing with Mr. J. Eglesie presiding at the piano.

The following were elected for the ensuing year:—

A. F. Wilson, president.
T. H. Beach, vice-president.
M. Murray, director.
R. S. McQueen, director.
R. B. Hayes, director.
A. Buckley, secretary-treasurer.

The question of appointing a district agriculturist in the district of Gleichen was lively discussed and on motion was left in the hands of the executive, also the arrangements for a Provincial Government School to be held sometime during the year as well as the invitation of speakers to lecture in Gleichen.

A delightful supper luncheon was served by ladies, after which a time of dancing was thoroughly enjoyed. The music was kindly supplied in the well-known whole-hearted way of Mr. J. Grant and his associates. Some 117 persons were present. It was generally felt that once again the Gleichen Chamber of Commerce had justified its existence and had in its various activities created a great deal of fellowship and enthusiasm in the district.

QUEER QUINTON'S QUILL

An engineer found on his examination paper the question, "What is a crank?" and his answer was, "A d fool." And he ought to have received one hundred percent for it. Cranks are no good to themselves nor any one else. But what of those who are carried away by the latest fad or the mob enthusiasm—followers of the crowd? Then in between must lie the very few who are not antisocial but have the moral stamina to maintain the happiest relations with their fellows and yet refusing to do or to think just because the crowd does. We recall a university professor who, during the Great War, got down his German books and started reading them. While others were hating both the language and the race, he was sympathetically studying both in order to maintain his balance. "Balance," pretty big idea, isn't it? Blessed is the man who has it.

THE TENNIS CLUB ANNUAL MEETING ELECT OFFICERS

The annual meeting of the Gleichen Tennis Club took place last night in the club room of the Community Hall with Mrs. Sather in the chair.

The following were elected officers for the ensuing year.

A. F. MacCallum, president.
B. Cardinal, vice-president.
M. Yates, secretary-treasurer.
Misses Miljour and K. Lewis executives.

Last year the fees for adults was \$5.00 and on motion of W. Sutermeister the fee was reduced for this year to \$3.50. The student fee of \$2.00 is the same as last year. The Saturday and in summer holidays will give the students plenty of play.

It was decided to put on a dance sometime in April. The executive committee will look into this matter and decide what to do.

LARGE TURNOUT TO BOARD OF TRADE MEETING MONDAY

The Gleichen Board of Trade held their regular monthly luncheon and meeting Monday evening at the restaurant of Sam Dufosse. The meeting was well attended, over 30 members being present with W. Sutermeister in the chair. Considerable discussion took place over the various subjects brought up.

The auto camp committee will report at the next meeting on their findings as to what should be done to fix up the auto camp.

A dance will be put on by the Board of Trade Easter Monday and any proceeds made from the dance will go towards buying trees to plant on the streets. The Gleichen Fire Brigade have in the past held their annual dance on Easter Monday but for this occasion they have donated the Easter date to the Board of Trade. In this connection it might be added the Board of Trade wish to thank the fire department for their generosity to the Board.

It was also decided that some recognition should be made to the hockey boys in bringing the intermediate hockey championship to Gleichen. A big banquet was suggested at which some presentation would be made. Messrs. Gilbert, Harrison and Peneu were appointed a committee to look into this matter.

The town has offered the old blacksmith shop, formerly used by Dan MacDonald and the restaurant to the west to the athletic club to be torn down and moved to the lake. The lumber to be used in erecting a building with a dressing room and in the centre a room for a booth. Some thought the top of the old restaurant should be cut off and the bottom story moved to the lake and the surplus lumber from the blacksmith shop and restaurant used to put a roof on the dressing room building. The Board of Trade have \$73 to hand over for this work and will donate a \$100 more if the athletic club can finance the balance and complete the building with volunteer labor. Joe Guttman who heads the athletic club feels certain the club can do this.

New members present at the meeting were Messrs. Smith, Mahoney, J. Greer and Blackwell.

ACTIVITIES OF THE GLEICHEN BRANCH Y. P. S. ASSOCIATION

The Y. P. C. A's put on a very successful program on Friday, March 11th. Four local items were given in addition to what the group put on. The amount realized from the sale of tickets was \$17.50 and after expenses were paid about \$13 was cleared. The group wishes to thank all those who took part to make the program a success.

The Y. P. S. A's held their meeting in the United Church, Sunday evening last after the service. After the business period Mr. G. Goderham gave a very interesting talk on the Blackfoot Indians which was thoroughly enjoyed by all present.

On Friday, April 1st, the Y.P.C.A.'s will put on a sale of home-cooking and sewing and will serve afternoon tea, the proceeds to be used to put improvements on the United Church.

The Gunners won the first cup of the Province and our neighbor Strathmore is on its way to win the Morgan cup, and a little further up the line the Bronks are on their way for the Allan Cup so it won't be long before the cups are three stations apart.

Mr. F. H. Rushworth, Calgary drew a horse in the Grand National, Irish Hospital sweepstakes, Tuesday. The race is to be run March 18th. The winners are getting closer to Gleichen all the time, so we won't have to fake telegrams.

A thin skinned juicy lemon, about the size of a pigeon's egg has been developed in Japan.

THE NEWS AS VIEWED BY THE EDITOR

When a church seeks a Pastor, it often wants a man with—
The strength of an eagle,
The gracefulness of a swan
The friendliness of a sparrow
The gentleness of a dove
The night hours of an owl
and when it catches that bird it expects him to live on the food of a canary.

Canada produced 82,614 automobiles last year, almost 50 percent under the previous year.

This town has never really taken up hockey in a serious way. Other towns do it much better. One paper records that after their hockey tournament "a pair of skates, a bell and a set of false teeth were found back of the rink. So far as is known the rest of the referee escaped." And in a game down in a little Saskatchewan town, the referee had his leg broken when he tried to stop a fight and the playing teams and supporters all tangled. They phoned for police reserves twenty miles away and when they arrived the battle was still raging.

"How much are rooms here?"
"Two dollars and three dollars a day, sir."
"What's the difference?"
"The two dollar rooms are all taken."

The prolonged deadlock in Shanghai has given the radiocasters, at least, time enough to learn the pronunciation of the names in that sector. A costly bill, however, for the radio listeners' geography lesson.

John Philip Sousa's baton was the wand that opened countless dull ears to the limitless harmonies of music. His marches moved the feet, then the heart. The Marine Band had only two American members when he became its leader. He filled it with Americans; he made music an American profession. With a Spanish father and a German mother, he was himself tensely and characteristically American. For his first march he received a dictionary; for "The Stars and Stripes Forever" more than \$300,000. His measure and his method were American, yet Germany was an enormous buyer of his compositions. He loved the whole world and the whole world loved him. But rightly his own country loved him best. When he lifted his baton above his marvelously trained band he achieved a triumph of interpretation—he made the United States feel the rhythmic pulsing of its own life.

Considering the way some persons live beyond their means, it is fortunate for them that the Government has not levied a "outgo" tax.

Michigan and Wisconsin cherry growers have promoted a cherry pie contest in honor of Washington's two hundredth anniversary. Many, however, would like to sponsor such a contest merely for the sake of eating the entries.

Perhaps Shanghai's "International Settlement" may yet prove to be more than the name of a local community.

The number of neutrons to the ounce may be 200,000,000,000,000,000, but how do you pronounce the number?

The editor of the Stately Advertiser says that from time to time he has had yearnings to get going and become a great man. But when he heard of poor Lindy's trouble, he was mighty glad he had never become rich and famous.

A local farmer says the reason he hasn't got his car license yet is because he doesn't know what to put with it to get it. He can sell ten fat hogs, or a fat beef, or 50 hens, or 100 pounds of butter or 40 bushels of

Much Interest in Horticultural Meeting Many Questions Are Asked by Large Audience

Messrs. Park Superintendent Reader, Doughty-Davis and Wodell, Talk on Many Subjects of Interest to the Large Number of People Present

The Gleichen Board of Trade sponsored an evening of lectures in the Community Hall. Wm. Reader, of Calgary City Parks Department was the principal speaker of the evening. Mr. J. E. Wodell of Calgary Herald gave the opening address introducing the subject under discussion viz: gardens, trees, flowers and vegetables in a most pleasing manner. Mr. Wodell spoke of the place which the amateur work in the gardens should take in the life of everyone. Mr. Wodell also pointed out the moral aspect of the question of gardening and the elevating influence which trees and flowers have on the mental attitude of the people.

Mr. Doughty-Davis, town planning engineer for the City of Calgary, followed Mr. Wodell in the series of lectures, speaking particularly of the planning of gardens throughout a town; the playing fields for high school as well as elementary schools with ball diamonds, tennis grounds, sand pits and grass stretches. He also mentioned the location of the same pointing out particularly station grounds, approaches to towns, vacant lots, not suitable for buildings as well as other unsightly corners, which can be transformed into some of the most beautiful garden spots of the town.

Mr. Wm. Reader, the principal speaker of the evening, made it his purpose to answer a great many questions which had been raised by the

citizens of Gleichen and had been submitted to him by Mr. James Black, secretary of the Gleichen Board of Trade, sometime previous to this meeting. The questions were of a very varied nature, touching in the growing of roses, the pruning of trees, the arrangement of gardens, the planning of boulevards and streets planting of trees.

Practically every home in Gleichen was represented at those lectures and no doubt the speakers can feel that a great deal of good will come from their valuable advice.

Messrs. Reader, Doughty-Davis and Wodell came to Gleichen at considerable inconvenience to themselves, due to the necessity of travelling on night trains; all the more they deserve the appreciation and the thanks extended to them by the citizens of Gleichen and particularly the Gleichen Board of Trade.

W. Sutermeister, president of the Gleichen Board of Trade, occupied the chair; A. R. Yates as Mayor of Gleichen, N. T. Purcell and James Black as members of the executive of the Board of Trade also were seated on the platform with the speakers.

It is an endeavour of the Board to again have from time to time lectures of this kind stimulating the interest in tree planting and horticulture. It is wide-awake at present in Gleichen due to the irrigation system so successfully installed during the past year.

wheat. He is trying to make up his mind which of all these products is likely to go lower and that's what he will tell.

Another kind of frozen asset is cold-storage cash.

A CALAMITY CRY

In a recent sermon, a New Jersey pastor made a statement that sounds quite familiar, as follows:

"There is lawlessness everywhere. Children no longer obey their parents. It is evident that the end of the age is at hand."

Then the pastor told the congregation that the words were not original with him, not even an utterance of the present day. They were translated from an inscription on a brick found in the ruins of ancient Assyria, dating centuries before the time of the patriarch Abraham.

Records which have been preserved during all periods of recorded history give evidence of similar conditions existing in the world. Sometimes an improvement is noted; again lawlessness and violence become more prevalent than ever.

While present day conditions are bad enough, it seems that on the whole they are better than in the past. There is more thought given to the relief of suffering, to the betterment of industrial conditions, to mutual helpfulness and like matters of benefit to humanity than in former times.

Although the world war gave civilization a severe set-back in some respects, we must remember that war has marked the history of every generation of mankind. The same is true of lawlessness, oppression and every other manifestation of immorality.

These will always exist in greater or less degree, so long as good and evil struggle for mastery in the hearts and minds of men.

Douglass and Jessie Grant were week-end visitors at their home.

WORLD HAPPENINGS BRIEFLY TOLD

Canada's industrial highways in total \$800,000,000, covering roads estimated at 390,000 miles in length.

Waterloo bridge is sinking and must be replaced by a new bridge. Estimated cost, \$12,000,000. The present bridge was opened in 1817.

A total of 42,300 people were naturalized during the fiscal year ending March 31, 1931. Twenty-seven certificates were revoked. Those naturalized were mainly Central Europeans.

Purniture and other articles recently seized by the police in Montreal (Gaulin's) sentary brought \$132,222, when they were auctioned to help pay the property.

William Miller, 73, pioneer, is dead at Calgary. He attended the ceremony of driving the last spike at the Canadian Pacific Railway line at Cranleigh, B.C., in 1885.

The Citroën-Hercules-Air-Expedition, travelling 8,000 miles across the globe, left London on Jan. 10, 1931, at 120 degrees above zero to 26 degrees below.

Premier Tammie of British Columbia does not agree with the reports tabled at Ottawa stating the Peace River outfit was not feasible at present. He supports building of the outfit.

F. W. Powell and R. M. McDonald, regarding the departure of an expedition to seek treasure on the Congo River, recall a similar unsuccessful expedition they took part in 45 years ago to seek the same treasure.

There will be no election in the French dominions and reparations policy under the government headed by Raymond Bartlett, the premier told the Chamber of Deputies in his first ministerial declaration.

A bill to link Glacier National Park with Watkins Park across the Canadian border in an international Peace Park has been reported favorably by the United States House of Representatives public lands committee.

Her Majesty Queen Mary, accompanied by the Duke of York and Prince George, visited the Canadian National Exhibition at the Ontario Agricultural Fair at Olympia, London, England, according to a cable received by the Department of Trade and Commerce.

C. N. R. Branch Lines

\$648,000 To Be Expended On Streetcar Work This Year

A total of \$648,000 will be expended on branch line construction for the Canadian National Railway during this year, that amount being authorized in the 1929-1932 programme, according to a return tabled by J. R. Manly, Minister of Railways, in the House of Commons. A number of the branch lines are completed, but work this year will be confined to five, of which two are in Alberta, one in Saskatchewan, one each in British Columbia and Ontario. The programme follows: Bulwer (Alberta) \$250,000; Brandon (Ontario) cut-off, \$212,000; Hamilton-Burlington (Ontario) \$150,000; St. Walburg (Saskatchewan) \$200,000; Louis J. La (B.C.) \$171,000.

Expenditures in connection with the programme up to December 31, 1930, amounted to \$1,015,760, during the year the sum of \$4,748,000 was expended. The 1929-1932 programme is a five-year schedule, plus the customary 15 per cent. totalled \$3,081,500.

A number of the construction have been discontinued for the time being.

Still Some Differences

There are still some differences between the rates, despite the desperate efforts to eradicate them. The rates never saw a man earnestly endeavoring to ascertain by a prolonged study of the outside of the envelope when the letter came from instead of once and for all.

Anyone who has lived through 1931 safely could not be afraid of any winter 1932 can do to him.

There are still some differences between the rates, despite the desperate efforts to eradicate them. The rates never saw a man earnestly endeavoring to ascertain by a prolonged study of the outside of the envelope when the letter came from instead of once and for all.

Gasoline Tax

Net Revenue Shows For Saskatchewan For Year 1931

The Saskatchewan gasoline tax resulted in a net revenue of \$1,254,045.50 being received into the provincial treasury in 1931, figures made public in the regular declaration.

The total amount collected through the tax was \$2,458,075.07, of which \$1,145,028.20 was retained in addition to \$50,088.50 paid out by way of commissions for collection.

In addition, it was stated by Hon. A. C. Stewart, Minister of Highways, that a quarter of a century ago the Saskatchewan had 13,578 licenses for trucks in 1931 for public vehicles, 110 for freight vehicles, 103 for motorcycles, 570 for heavy vehicles, 32 for pedal bicycles with motor attachments and 1,107 for trailers.

A Good Investment

Big Business In Orient Developed From Few Gitts

About a quarter of a century ago the Standard Oil Co. gave away without cost a large number of kerosene oil lamps and stoves in China and throughout the Orient. This was designed to increase the demand for kerosene.

In addition, it was stated by Hon. A. C. Stewart, Minister of Highways, that a quarter of a century ago the Saskatchewan had 13,578 licenses for trucks in 1931 for public vehicles, 110 for freight vehicles, 103 for motorcycles, 570 for heavy vehicles, 32 for pedal bicycles with motor attachments and 1,107 for trailers.

Comets and Meteors

Interesting Facts Given In Lecture By Ontario Professor

The spectacular objects familiarly known as shooting stars are not stars at all, but minute particles of cold matter flying through space.

The coming into contact with the earth's atmosphere, glow with the heat of friction, pass away, in bright streaks, in a few seconds or fall into the earth, was a fact brought out by Dr. Kingston, professor of astronomy at the University of Western Ontario, London, Canada, in an interesting illustrated address on "Comets and Meteors."

The comet is a small body, called a nucleus, which seems to move in a regular orbit, and moves rapidly, are in reality only thirty-four, maybe thirty miles away and are moving at only about thirty to sixty miles a second, not a really high rate of speed when compared with that of some other astral bodies.

Some meteors are larger, however, and numerous examples are preserved, which have fallen into the earth, weighing from a pound or so to several tons. The falling of the large meteor is believed to have caused the great crater in Arizona at least a hundred feet deep and nearly a mile in diameter. The greatest meteor known in modern times is the one which fell in Siberia in 1908, leaving a number of craters. This fell with terrific force and heat, and the crater within a radius of over twenty miles were flattened to the ground.

In concentric circles like so many pine trees, trees were scorched and scores of animals killed. Falling in a very isolated area, it is not known that this caused the loss of any human life, but had it fallen in a city thousands of lives would doubtless have been snuffed out in a minute.

Dr. Kingston also spoke of comets at some length, some travelling on open orbits, which are drawn within the earth's vision by the gravitational pull of the sun, circle around the sun and then vanish again into space, probably never to return. Others, however, like Haley's comet, which was seen in 1910, will return in a few hundred or millions of miles in length, but returns with mathematical regularity at fixed periods, and astronomers can estimate accurately the effect of the sun on the comet, some of which are broken up into minute particles by its power, was discussed at length.

Clean Seed For Farmers

Hon. Mr. Buckle Announces Plan For Cleaning Wheat In Relief Area

The Honourable W. C. Buckle, Minister of Agriculture, announced plans for the cleaning of wheat supplied to farmers in the relief area of Saskatchewan.

The stocks in local elevators will be distributed in such a way that the satisfaction of farmers will be taken into account, and it is hoped that the wheat will be cleaned in the elevators.

The cost of cleaning the wheat is included in the price and these cleaning charges will be paid by the farmers from the Saskatchewan Relief Commission of 2 1/2 cents per bushel.

When a farmer is unable to clean it himself he will make his own arrangements for getting it cleaned and the Relief Commission will pay to the elevator a rate not exceeding 2 1/2 cents per bushel for the quantity of wheat cleaned. The charge will be based on the quantity of uncleaned wheat cleaned in accordance with the plan.

The operator of the cleaning machine will be required to submit to the Relief Commission satisfactory evidence of cleaning. Proper forms for this purpose can be obtained from the local relief office.

The Relief Commission will only accept responsibility for cleaning charges on wheat supplied by the Relief Commission.

Any cleaning for which the Relief Commission pays must be satisfactory to the Saskatchewan Department of Agriculture, whose representatives will make periodical inspections of cleaning operations as soon as the wheat is released for delivery to farmers.

Store Gas For Planes

Tractor To Be Used To Establish Caches For Fuel Operating

In North
A caterpillar tractor swing to establish caches of gasoline for the aeroplanes flying into the Great Bear Lake country will have Prince Albert a few days to make its way over treacherous rivers and lakes of the north.

The "swallow" route will be via the Lake Athabasca, near McMurtry, Alberta, and from there up the Mackenzie River, a total distance of 1,000 miles.

This transportation venture of the Government, which has never been attempted, The outfit will travel light to McMurtry, and of steel, where the gasoline will be picked up in the event the destination in the northwest is not reached.

To give sufficient time for the tractor and sleighs to be brought back, they will be sent to Port Hara until next winter.

Following the "swing" departure, Mr. C. B. Barrett, who is in charge, checking the ground party's progress from the air. His business at McMurtry will include the testing of the Mackenzie River ice to ascertain what care will be necessary to ensure safe passage for the tractor. The plane trip will be made via Port Chipewyan and Stony Lake, the latter point the destination of a recent flight to Inuit in the death of the late Corporal La. The plane crew remains here until the ground party is sent to the north.

It is expected that the first of the season's flying into Great Bear will be in April and will be followed by a series of supplies with which to start the summer's work.

Need More Population

Not Sufficient People In Canada To Shoulder National Debt

Canada must have more population, said Acting Minister of Immigration, told the House of Commons. "Whether we like it or not, we are placed on the positive side of immigration," he said, "if we hope to pay off our debt."

The Dominion's "back to the land" campaign has been a failure, he said, and the government is now turning to the cities and made independent. "That," he added, "is no mean accomplishment."

Having well composed almost completely of glass, a New York architect has designed a new school building with a view to saving lighting expenses.

French producers of dyes supplied about 90 per cent of the domestic demand last year.

Russian Troops Reported To Be Moving Down To Manchurian Frontier

Mukden, Manchuria.—Several thousand Russian soldiers are said to have moved down toward the Manchurian frontier, presumably because of Moscow's apprehensions over Japanese troop movements in northeastern Manchuria, the Rango (Japanese) news agency reported from Harbin.

Meanwhile, the Japanese expedition, headed by General Jiyu and aimed at Chinese rebels in the vicinity of Taipei, was held up by difficulties developed in getting permission to transport troops over the Chinese Eastern railway, jointly owned by Russia and China.

Officials of the railway said they were unable to furnish trains requested by the Japanese because they had not received instructions to do so from Moscow.

Tokyo, Japan.—The cabinet approved an extraordinary appropriation of 22,000,000 yen (currently \$7,640,000) to meet additional military expenses in connection with the Japanese expedition to Shanghai.

Japanese military authorities are working at top speed to hasten the protection of Shanghai to carry out the cabinet decision to double the army forces at Shanghai. Meanwhile residents of Tokyo had some direct contact with Russian troops. Troop trains passed close to the city and there were other military measures which gave the public a chance to put on demonstrations for the departing soldiers.

Question Of Deportation

Matter Is Raised In British House Of Commons

London, Eng.—The question of deportation of British immigrants from Canada was raised in the House of Commons when Rt. Hon. J. H. Thomas, secretary for the colonies, assured the House that government was in constant communication with the Canadian government on the matter. The ultimate authority was the Dominion government, he believed.

In 1930, Mr. Thomas told a questioner, Canada deported 290 persons who had gone out under state assistance, on the ground that they committed offences; and 1,402 became deported because they became a public nuisance. In 1931 the figures were, respectively, 367 and 1,381.

Guilt Of Excesses

Large Number Of Chinese Put To Death By The Japanese

London, Eng.—The foreign office published the second report of the committee of observers sent to Shanghai by the League of Nations Council.

Since February 7, it said, "a state of open war has existed here." It reported a large number of Chinese property had been put to death by the Japanese but no trace of many of the victims had been found.

The Japanese council, the commission reported, admitted that there had been excesses. Although some of the cases had been cleared up, the number of deaths still unaccounted for is large.

Has Labor Support

Reported Move Will Assure De Valera Comfortable Majority

Dublin, Irish Free State.—The Labor Party, which held the balance of power in the next Dail Eireann, reported it would line up with the Eamon de Valera's Fianna Fail (Republican Party) to out President Michael T. Cosgrave from office, even if he does not resign by March 9, the day on which the dail will convene.

Both a move on the part of the Laborites would assure De Valera a comfortable majority on a motion to elect him president of the executive council (cabinet), that is president of the Irish Free State.

British Columbia Shingles

Vancouver, B.C.—A train load of 25 cars of British Columbia shingles, part of an order for 34 cars, representing 700,000 shingles, was loaded to roof over 400 acre dwellings, now rolling to eastern Ontario.

Censor Troop Movements

Tokyo, Japan.—Censorship was invoked again to check the movement of Japanese reinforcements from Shanghai from any other place.

W. N. U. 1931

Improvement In Wheat Situation Is Predicted

Statistical Experts Believe Canada Will Again Sell To Europe

Ottawa, Ont.—Cables from Italy, Germany and Russia brought encouraging news to Canadian wheat standstill in regard to the wheat situation. It is allowing its millers to use a larger percentage of foreign wheat beginning March 1. Germany is soon to be a buyer of wheat again.

Meanwhile, Lora Runda comes word of shortages for seed purposes in the Volga, Siberia and Kazakhstan areas.

The dispatch from Berlin predicted a German wheat boom. The wheat, it is corroborated in letters which Jim H. Stevens, Minister of Trade and Commerce, has received. Statistical experts of the department also expressed the opinion that soon Spain would lift the barriers against foreign wheat as her domestic supply, because of the buying France has been relaxing her restrictions until now the millers can mix 90 per cent of foreign wheat and this may be increased.

Statistical experts here take the view that very soon Italy, France, Spain and Germany will all be buying wheat from Canada. It is suggested that help Canada materially. The Dominion has approximately 180,000,000 bushels of wheat for export.

Victims Of War

Rt. Hon. Arthur Henderson Makes Appeal On Behalf of Children Of The World

Geneva, Switzerland.—Rt. Hon. Arthur Henderson, president of the world disarmament conference, addressed an eloquent appeal to the assembled delegates in behalf of the children of the world. He said that children are always the victims of war.

President Henderson's address marked the closing of general sessions at the conference. It held a note of hopefulness.

Many millions of children were sacrificed behind the lines in the Great War, he said, to tuberculosis, typhoid and other diseases which ruthlessly destroyed a rising generation.

Honored Noted Author

Large Crowd Attends Funeral Of Edgar Wallace

Little Marston, Eng.—The greatest crowd this village has seen in many years gathered for the funeral of Edgar Wallace, noted author, who died in Beverly Hills, California, recently.

The solid bronze coffin was borne by eight men, and the Reverend G. B. Mildred, vicar of Little Marston, officiated. The author's son, Bryan, was the only member of the family present.

Women Granted Vote

Rio De Janeiro, Brazil.—Detallo Vargas has signed an election law granting the vote to women and providing the secret ballot. The measure becomes effective within 30 days.

BRITAIN'S EMERGENCY CABINET SITS ALL NIGHT ON WAR SITUATION

London, England.—The British Emergency Cabinet Committee sat all night keeping constant touch with the latest developments in Shanghai. The committee will maintain contact with the situation in Shanghai and will be prepared to meet on one hour's notice. This is the first time since the World War that such a committee has been formed. Above are five of the seven Emergency Cabinet members. Left to right: Sir John Simon, Foreign Secretary; Lord Halifax, Secretary of War; Centre: Right Hon. Stanley Baldwin, Lord Privy Seal; and below: Neville Chamberlain, Chancellor of the Exchequer; and Sir Samuel Hoare, Secretary of State for India.

Many delegates expressed dissatisfaction with the working of the present British Emergency Cabinet. The convention decided to ask the provincial legislature to amend the act to provide amalgamation of the present emergency cabinet with the members with the chairman of a trustee in bankruptcy. Another amendment was proposed to prevent the launching of any legal proceedings for the recovery of debts without the permission of the committee.

Awarded Flying Trophy

Ottawa, Ont.—The Trans-Canada trophy for 1931, given annually for merit in flying, was awarded to the pilot of an aviator in Canada, has been awarded to George H. R. Phillips, expert pilot of eastern flying operations with the provincial air service of Ontario.

The award was made by Hon. J. D. McBurney, Minister of National Defence.

Volcano In Action

Tokyo, Japan.—The volcano Anaga, which has been dormant since 1891, went into violent eruption for the third time in a month, scattering ash and lava over a wide area, setting fire to nearby forests and damaging a few houses in the nearby village.

BETWEEN NEW RECORD

Run By Sir Malcolm Campbell

Speed Record

Daytona Beach, Fla.—Sir Malcolm Campbell, British "peep king," who hung up a new world's speed record of 235 miles an hour with his "Bluebird" racing machine on Daytona Beach.

Statistical experts here take the view that very soon Italy, France, Spain and Germany will all be buying wheat from Canada. It is suggested that help Canada materially. The Dominion has approximately 180,000,000 bushels of wheat for export.

Russian Wheat Shortage

Seviet To Use Thirty-Two Million Bushels For Seed

Statistical Experts Believe Canada Will Again Sell To Europe

Ottawa, Ont.—The Dominion Bureau of Statistics has received a cable from London and Volga, Kazakhstan, and the United States to the disadvantage of the latter appears in the course of the transportation of wheat to principal areas by March 10.

U. S. to February 10, 99 per cent of this program had been fulfilled.

This report gave further evidence of the suspected crop failure over large Russian areas last season and a new world's speed record of 235 miles an hour with his "Bluebird" racing machine on Daytona Beach.

Statistical experts here take the view that very soon Italy, France, Spain and Germany will all be buying wheat from Canada. It is suggested that help Canada materially. The Dominion has approximately 180,000,000 bushels of wheat for export.
